

Lab 0

Goals:

- Install the software required for writing and running Java application programs.
- Write a simple Java program

Install the required software

Refer to the LabGuide

Problem Description

Write a java program which displays some information about you.

When your program is executed the following should be displayed.

Please make sure the starts are displayed as well.

```
*****
*
*      Name: your name
*      Students Number: your students number
*      Courses: List of the courses you are taking
*
*****
```

You need to do the followings:

- create a file called MyInformation.java
- write your java code in that file
- compile and run your program
- add some comments to your program
- Create a zip file including your MyInformation.java file and submit the zip file to Brightspace.

Marking Scheme

- [4 marks] Presentation/Style: Organization and indentation
- [3 marks] Correctness: Program works without any bugs.
- [3 marks] Documentation : Infernal (i.e. comments)
