

BioLab

1. (Done on Brightspace)
2. I have taken Computer Programming in grade 11 and 12.
3. I learnt Python and Java, with a very rudimentary knowledge of SQL.
4. I would expect the course to teach me the fundamentals of program design and how to optimize the code that I write.
5. I am currently in my first year and semester in the Associate of Science: Computer Science Program.
6. I currently live in Vancouver, so the time conflicts do not apply to me. Other than that, there is nothing that I want to say other than I look forward to a great semester!
